PRICE TWO CENTS

ELECTRICALS HOLD FIRST MEETING

Professors Adams and Pendar Spoke at Yesterday's Dinner.

Last night the Union was the scene of the first meeting of the Electrical Engineering Society. The fifty men present first held a business meeting, at which 20 men were elected to membership. After the plans for the coming year had been told, the first speaker, Professor C. A. Adams, was announced. Prof. Adams is here taking Prof. Jackson's place. He spoke on the opportunities for engineers, and compared the engineering profession in general to the other professions. He said: "A doctor buries his mistakes, while an engineer is buried by his mistakes." His talk throughout was live and up to date, and gave the men clear ideas of chances ahead of them.

After he had finished the members of the society elected him an honorary member. Then Prof. Pendar, acting head of the department, spoke on the research work being done in the Electrical Engineering department. He mentioned the work on electric vehicles, traffic conditions at freight terminals, and the solution of the problems presented by the proposed erection of a 150,000 volt transmission line at the New Site.

The men who have already signified their intention of coming to speak before the society are all prominent in the electrical world. Mr. Murray, of the New York, New Haven and Hart-

(Continued on Page 2.)

SOPHS PLAY RINDGE.

Third Game Will Be Played at Field This Afternoon.

The Sophomore football team will meet the strong Rindge Technical School eleven at the Field today in its third game of the season. More men have been showing up for practice lately, and the squad is now turning out the genuine article. All the men who go out to the Field today will be able to see two events for the price of one, 25 cents, as the Fall Handicap Meet and the game will take place at the same time. The football game starts at 3:15.

The Technical School men having been showing up pretty strong in their games to date, the Sophs will probably be up against it. This game will provide the first real chance to get a line on what the 1915 men can do, and they are out to make a good showing. Most all the men on the squad will be given a tryout by Captain Scully, and this game will go a long way towards deciding a permanent lineup.

The following men will probably start the game with the following positions: Boynton, center; Quirk, left guard; Murphy, right guard; Howkons, left tackle; Proctor, right tackle, while the end positions are uncertain. Fletcher and Howlett are first choice for the ends but may not start the game. The regular backfield will play: Scully, quarterback; O'Brien, left-half; Dalton, right half; and Helseth, full back. Whiting has a chance of starting the game in the line as he has been showing up well at practice.

MANY ENTRIES FOR FALL HANDICAP MEET

Germain and MacLeod Scratch Men—T Runners Will Have to Run Well.

This afternoon the Fall Handicap Meet will be held at the Tech Field, and will start promptly at 2:45. Both the Varsity and the candidates are entered and the entry list is large. Each event is well supplied with men, with the exception of the pole vault, in which only the Freshman, Laura son, is entered. The Varsity men will have their hands full beating the candidates, for the handicaps are many and liberal. The 440 and 880 promise to be the races of the day, as in these events two Varsity men will fight it out, Guething and Bylund in the former, and Guething and Germain in the latter. C. T. Guething, with 35 yards lead, is also entered and is apt to push the upperclassmen to the limit.

As an added feature a football game between the Sophomores and Rindge Technical will be played. The meet will be held under any conditions of the weather except the most impossible. The admission fee is twenty-five cents.

If any man wishes to enter whose name is not below he may enter at the Field before 2:45 o'clock and receive his handicap.

The list of entries is as follows:

(Handicaps in Yards.)

100-yard dash—H. S. Wilkins, scratch; A. Crankshaw, 2; C. S. Reed, 4; E. A. Teeson, 5; N. D. McLeod, 6; A. C. Lieber, 6; T. K. Hine, 7; D. L. Comiskey, 8; E. J. Goldstein, 9; W. Eastman, 9; W. H. Smith, 10.

220-yard dash—C. H. Wilkins, scratch; T. H. Guething, 1; A. Crankshaw, 7; C. S. Reed, 10; G. C. Lawrence, 11; E. A. Teeson, 12; E. T. Kingsbury, 12; H. B. Smith, 12; T. K. Hine, 18; D. L. Comiskey, 18; T. B. Can, 19; W. H. Smith, 20; W. Eastman, 21.

440-yard dash—T. H. Guething, scratch; W. R. Bylund, 10; G. C. Lawrence, 20; D. B. Baker, 22; A. F. Nye, 25; A. C. Lieber, 30; L. E. Best, 30; (Continued on Page 3.)

SENIOR DINNER PLANS.

Election Results Will Be Announced Wednesday Night.

Next Wednesday evening, October 30, the results of the 1913 Class elections will be announced at the Senior Class dinner. The best dinner that the Union can produce is promised to those who come. The diligent efforts of the dinner committee have been rewarded by the securing of several "live-wire" speakers. The names of these will be announced later in THE TECH. As an additional inducement there will be free smokes, souvenirs, and a few musical numbers.

Tickets will be on sale by all the prominent class officers. The greatest: Senior Class dinner is expected.

JUNIORS, ATTENTION!

An error was made in the printing of the second edition of the 1914 Class ballots. The name, D. D. Dunn, nominee for Vice-President, should read D. O. Dunn, and the name, T. H. Chase, candidate for Institute Committee, should read T. L. Chase.

BIG WILSON RALLY IN UNION TODAY

Sherman L. Whipple of Boston to Address Students On Current Topic.

At 1:30 P. M., on Monday, the Woodrow Wilson Club of the Institute will hold a mass meeting in the Union, to which every one in Technology is urged to come. This is to be one of the biggest meetings of the club before the debate with the Progressive Club at the end of the week, and it is expected that an enthusiastic rally will take place.

The Woodrow Wilson Club will have as the important speaker of the meeting Mr. Sherman L. Whipple of Boston. Mr. Whipple has practiced law in Boston since 1885, and for the last ten years has been a member of the noted law firm of Whipple, Sears & Ogden. He has also acted as legal adviser to Governor Foss during the latter's administrations. Mr. Whipple is a Trustee of Colby Academy and of the County Savings Bank of Chelsea. For years he has been a member of the New England Historical and Genealogical Society, the Bostonian Society, and of the American and Boston Bar Associations, and also of the Algonquin, Twentieth Century, County and Yale Clubs.

Mr. Whipple received the degree of A. B. from Yale in 1881, and the degree of LL. B. in 1884. A college man of the highest type, his influence in politics has been for the best. The men in charge of the meeting state that his talk will be of vital interest to every college man.

WORKERS WANTED.

Progressive Club Issues Call For Men to Work at Beverly Polls.

The Progressive Club of M. I. T. has issued a call for twenty volunteers, non-voters, to work for the Progressive Party in Beverly on election day. A candidate for the Legislature had his nomination papers all signed, ready to file, and the night before the last date for filing, his papers were stolen from his house. The only way by which voters may vote for him is by using stickers.

Leaders of the party are confident that they can elect their man if they can find twenty men to give out the stickers at the polls all day. Men who are willing to help in this work are requested to give their names and addresses to A. H. Waitt, president of the Progressive Club, or some other officer, or leave a note at the Cage. These men will spend the night before election at Beverly (all expenses paid) in order to be on hand at the polls the next morning. A few men have already signified their intention of going and a good sized party is expected.

The Freshman caps at Williams are black with a large yellow button. Freshmen are required to wear them until the Christmas vacation.

A village schoolmaster in France has invented a wireless instrument so sensitive that no antenna are needed. He has been able to intercept messages from England, Ireland and Germany.

TECH NIGHT GOES TO "BROADWAY TO PARIS"

Mr. Carb's Influence Wins Dean Burton Over—Committee Is Exuberant.

The "Tech Night" Committee has finally emerged from its trials and tribulations with the glorious prospect of seeing Gertrude Hoffman in "Broadway to Paris," at the Shubert. The show is just the right one for the occasion, and everything points to a record-breaking Tech Night, which will throw last year's moderate success completely in the shade.

The committee originally planned this very thing, as it was evident that no other show available was half so well adapted to the occasion. The management was enthusiastic in favor of the project, and willing to make any concessions. However, the aspect of affairs changed when the committee consulted Dean Burton. He expressed the opinion that the show was not quite respectable enough to be advertised as Tech Night, and told the committee to make some other arrangements.

As the management of the Colonial declined to discuss the matter, "Little Boy Blue," at the Majestic, seemed to be the next best thing, and the committee was resignedly making arrangements there when Mr. Carb rose to the occasion and saved the affair from dismal failure.

He held a consultation with the Dean, who meanwhile had listened to the protests of several influential members of the classes most concerned in the event. The outcome was that the Dean withdrew his opposition, Mr. Carb assuming the responsibility for the occasion, and agreeing to make such minor alterations in the play as were thought necessary. Those who know Mr. Carb know that the show will not be the worse for his revision. On the other hand, it is up to Technology to show Mr. Carb that he did not misplace his confidence when he assumed responsibility for the occasion.

OCT. 22 AT PRINCETON.

October 22 is a prominent date in Princeton's history. It marks the 166th anniversary of the founding of the college, also the 52nd anniversary of major sports. In the history of athletics, October 22, 1860, is famous, for on that day the first game of professional baseball was played between Princeton and the Orange Club team, at Orange, N. J., in a game which terminated in a tie score, 42-42.

THE WEATHER.

Forecast for Boston and vicinity: Saturday fair; cooler; moderate variable winds.

CALENDAR.

EDITORIAL.

The fact that there have been several men seen wearing their hats in the Union during the last few weeks is evidence of a condition among many of the undergraduates which is certainly not in accord with the spirit of Technology Union.

The Union was established as a club room for students and among other of its rules which, it was hoped, would make it primarily a homelike gathering place, it was decreed that all men should remove their hats. It is a custom which dignifies the Union and which makes it decidedly a better place for us to meet each other.

Let us all make every effort to express in our actions the feeling which every man knows at heart he has for the Union.

EDITORIAL CONTEST.

Subject For Tuesday Announced
—Two New Rules Added.

The first editorials written under the conditions of the Editorial Contest which the Pi Delta Epsilon is conducting have appeared, and it has been found necessary to add two rules to those already governing the contest. These rules are numbered 6 and 7. It is expected that writers will not be constrained in their style of writing. The Contest Committee want more up-
perclassmen to enter the competition. The following are the complete rules:

1. All editorials must have the name, class and address of its writer on each page.

2. Each editorial must be addressed to Pi Delta Epsilon Contest Committee and left at the Cage or in the upper TECH office by 5 o'clock of the day on which it is due.

3. Each contestant must have written on at least seventy-five per cent. of the subjects to qualify, and more credit will be allowed the contestant who writes on all subjects.

4. Contestants shall use their own judgment as to style and way of handling each subject, but shall refer to the editorial columns of THE TECH for the proper length.

5. Two subjects will be given out weekly during the first period of the contest, the first of which will be due on Tuesdays, and the second on Fridays. The subject for the editorial due on Tuesday will be published Saturday, and the second on Wednesday.

6. The information upon which editorials are based may be obtained from any source.

7. The manuscript of the editorials must be neat and present a good appearance.

The subject for Tuesday's editorial, due at 5 P. M., will be "The Value of Professional Societies."

WIRELESS SOCIETY HOLDS FIRST MEETING

Eleven New Members Elected
—Purpose of the Society
Explained.

Thursday afternoon the Wireless Society held its first meeting of the year, at which twenty men interested in this branch of science were present. President Affel presided and gave an outline of the aims of the society for the benefit of the new men present.

The principal object, he said, was to get the men together in the Institute who are interested in wireless, in order that they may learn more about it and be able to carry out experiments that should increase its usefulness. The society maintains a station of its own for experimenting, and all the members of the society are at liberty to use the instruments at any time and to try out experiments of their own. At the regular monthly meetings it is planned to have men prominent in wireless work speak to the fellows, and it is also planned to have a member of the society present a paper at one of the meetings.

The vice-president, Mr. Richmond, then addressed the society. He proposed the following names for membership to the society: L. W. Burnham, Y. M. Chu, L. L. Connelly, R. R. Desimond, W. Gaylord, W. L. Graves, O. W. Hilbert, D. Husted, Macy, E. B. Stockman, A. E. Windle. They were unanimously accepted by the society. He said that much of the work done by members of the society around the station had been done by Freshmen, and therefore they need have no hesitation about joining. The station at present, he said, was not working with its fullest efficiency. He hopes that some of the men will try out new ideas to see if they can remedy this state of affairs. The Holtzer-Cabot Company has promised to donate a pair of their highest grade receivers to the society, and this should go a long way towards improving the station.

Treasurer Lamson read the treasurer's report from last year, which showed a balance of about twenty dollars. He announced the fact that Harvard is about to erect an experimental wireless station with all the latest apparatus, and under the direction of Prof. Pierce of Harvard who is an authority on the subject. He suggested that the M. I. T. Society might arrange to co-operate with them and that the two societies might carry on experiments together.

The station of the Wireless Society is in a corner of the Electrical Engineering Laboratory, and it is open to all members of the society by key until 5 o'clock, and on Tuesday and Thursday evenings. Mr. Richmond announced that a meeting of the newly formed New England Wireless Society, composed of the M. I. T. Wireless Society, the Tufts Wireless Society, the Harvard Wireless Society and the original N. E. Wireless Society, is to hold its first meeting of the year, which is to be an open one, on November 2, at 8 P. M., in 23 Walker. All men interested in wireless are invited to attend, and the recently enacted wireless law will be explained and the men will be told how to obtain a license for operating a high power station.

ELECTRICALS MEET.

(Continued from Page 1, Col. 1.)
ford, spoke before the society last year. He was the engineer in charge of the electrification of the Hoosac Tunnel. Mr. Windsor, of the Boston Elevated, Thomas Edison, and Mr. Stonemetz, of the General Electric, will also be here.

Dressed in gaily colored pajamas, the two thousand students of the University of California recently held a grand festival, consisting of speeches, class stunts and musical numbers, called the "Panjamarino Play."

M. E. SOCIETY TRIP TO WATERTOWN ARSENAL

First Trip of the Year Proves
To Be a Big
Success.

Yesterday afternoon about forty
members went with the Mechanical
Engineering Society on the first trip
of the year to the Watertown Arsenal.
The party was shown the different
steps in the making of guns. They
were first taken to the foundry, where
they saw the metal poured into the
molds. The men also had a chance
to see a Bessemer converter in opera-
tion. From there they went to the
"setting up" shop, where the gun car-
riages are assembled. Next the ma-
chine shop and the forge shop were
visited, where trip hammers and drop
forges were in operation. From these
shops the visitors went to the testing
house, where they saw the 1,000,000
pound testing machine which is used
for testing out all materials. Every-
body had an enjoyable time and ex-
pressed themselves as having been on
the best trip ever taken by the society.

With a view to raising the standards
of scholarship of fraternity men to
the high standard of non-fraternity
men at Vanderbilt University, a
scholarship cup has been donated. It
will be awarded to the fraternity
whose members in the Academic and
Engineering departments make the
best record. The cup will be held for
one year. If won three times the fra-
ternity gets permanent possession of
the trophy.

THE TECH UNION BARBER SHOP

Located at the
HOTEL WESTMINSTER

Handy to the Institute. Up-to-date fashionable hair cutting by skilful barbers. The best hygienic and most perfectly ventilated shop in the Back Bay. Special attention given to honing razors. Carefully selected razors for sale on a guarantee for one year. Hoping you will convince yourself by giving us a trial, we are.

Yours very truly,
TECH UNION BARBER SHOP

WHY NOT JOIN THE 2nd Company

Coast Artillery CORPS

Mass. Volunteer Militia?

The South Armory is now fully equipped with up-to-date Fire Control and Range Finding equipment and guns will be installed the coming Winter. The work is technical and should be interesting to College men. Ten days tour of duty at the harbor forts.

Regular drills at the Armory Monday nights. Come and see us.

Albert L. Kendall (M. I. T. '94)
Capt. Coast Artillery Corps M. V. M.
Commanding Second Company
